1-3-44								MIL OPERATIONS
2-3-44								R.A.F. 610: The wing, led by W/C. H.G. Godfray, DFC & Bar, acted as penetration cover to Fortresses and Liberators and covered the penetration to Forest d'Ardenne. In this area they were bounced by Thunderbolts. Around Lens some unidentified aircraft were seen but the wing could not close on them. The wing now swept Lille area on the report of enemy a/c in that area but none these were later reported to have probably landed. Douai, Vitry and Lille aerodromes were swept from 7,000 feet but nothing was seen. North of a line Amiens to Ardenne the cloud was 6/10ths - 7/10ths and south of this

6-3-44	MJ306	IX	S/Ls. R.A. Buckham	Operational	1155	1350	EUROR 630: The role of our wing on this ramrod was close escort. The wing swept Beauvais area where enemy aircraft were reported but none were seen. Off Dieppe Harbour an unidentified twin funnel ship with drab camouflage was sighted heading north. Slight inaccurate flak was experienced from Dieppe. The cloud in the operations area was 6 - 7/10ths, whereas the channel was clear.

7-3-44	MJ306	IX	S/Ls. R.A. Buckham	Operational	1345	1555	EUROR 631: Our wing acted as escort cover to the bombers and the operation was carried out according to plan. On approaching the target a single a/c was seen to be following 416 Squadron. One section was detailed to attack but the a/c dove away into heavy cloud. The wing then swept Paris area where 10 plus 110's were sighted. The wing attempted to engage them but they also dove away into cloud. Some flak was experienced from Paris and Neuilly area. Smoke was seen coming from Le Treport which must have been caused by bomb bursts. The cloud in the operations area was 6 - 7/10ths at 9,000 feet whereas east of this it was 10/10ths.

Place	Date	Time	Summary of Events	SECRET	References to Appendices
127 Airfield H.Q. R.A.F. Station Kenley, Surrey.	1-4-44		No operations today, finished up army exercises, the lads learnt quite a bit about this type of flying.		
	2-4-44		Bad weather again today prevented us from flying all pilots were released at noon, the crackars club being the local rendezvous.		
	3-4-44		Very low ceiling this morning prevented any flying, however a few venturesome types did a little flying and about teatime a party was organised which turned out very sucessful.		
	4-4-44		A good deal of practice flying to-day Doug Orr on a spot of leave in London, to the envy of the rest of us.		
	5-4-44		The day started off with the now usual overcast so the Squadron attended a lecture on the new gun sight, given by P/O. Mottram and aided by our Hart Shirley. After the lecture those who could grab a 'kite' went nipping to try out the new sight, as again that all too familiar phrase was heard 'released for training'. NIGHT FLYING was again cancelled.		
	6-4-44		Duff weather again today, but a good softball game got going between the 'erks' and the pilots our new Padre did a good job of pitching for the pilots. Night flying was again scheduled for us but washed out again on account of the weather.		
	7-4-44		Another duff day found us on readiness. But still no flying.		
	8-4-44		At last the sun came out today and the wind came over to the dispersal and advised us he had requested permission to send the Squadron on a Dive Bombing mission. Spirits soared when the O.K. came through, and at 1500hrs the Squadron led by 'Brownie' took off with five hundred pounders to 'ring a'bell'. Near Le Report, our Squadron had the distinction of being the first Spit Group to commence the bombing of Europe. A high success so much so that every body is eager to have shot or go just as soon as possible, and a party is planned for to-night to honour the occasion.		
	9-4-44		Sister Sunday, some of the fellows looking the worse for wear after last night's party gradually got down to the dispersal and we are quite elated over our success of yesterday and deeply interested in the reports in the papers and on the radio over the bombing do.		
			Later in the afternoon we had a visit from the R.C.A.F. Recording Unit, and then later on a release a arrived for us, along with a new addition to the Squadron, namely jeep, which has saved quite a lot of shoe leather already.		
	10-4-44		About 0715hrs this morning we were rudely awoken by the call 'All Pilots of the wing report to their Squadrons immediately'. We were all set to go by 0830 hrs but a mist closed in on the field so we were put on 15 min readiness. The Squadron went on a show as target cover for some Mitchells and Marauders which plastered the marshalling yards at Charleroi. Fellow Section received a dose of 'Green' talk over Lille. Set out after some barges which turned out to be Mustangs.		
	11-4-44		A show was scheduled for early this morning but was cancelled. Very little doing today but were briefed for an exercise to take place early tomorrow morning.		
	12-4-44		Every one up about 0515hrs but told show was off, duff weather again. Took off about 0930hrs with the wing to do a patrol 'tribuna'. Landed at Holmley South and returned at 1630 hours. Jim McElroy had the experience of having to bale out and made the ground O.K. although he had the uncomfortable experience of having to go through cloud at 2,000ft.		
	13-4-44		On returning to dispersal we met Pete Logan who had his name changed from Pierre Lecocq. Today was spent in packing in view of another move, our planes were being fixed up with the new gun sight.		
	14-4-44		Party this morning the advance party left for our new location, another day of no flying and still more packing, and another party in the evening.		
	15-4-44		We were supposed to fly to Tengmire our new location today but as usual the weather was duff so once again we resigned ourselves to another bridge tournament, and another party.		
	16-4-44		Another duff day and no flying.
